ExamBuilder guru (bahan) — MCQ, Subjektif, Pemahaman, Esei

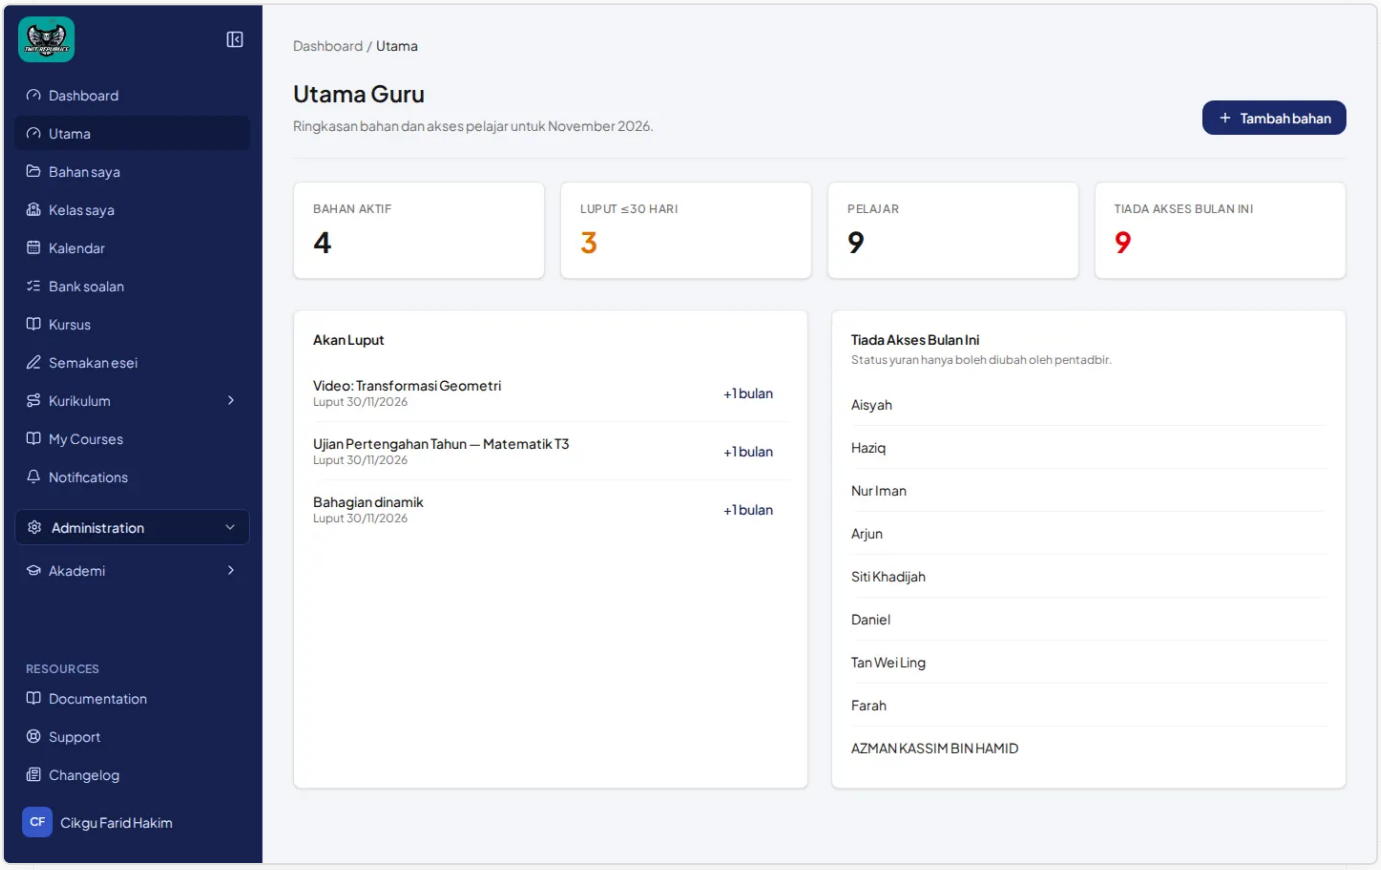

Panduan 3b — bina ujian pada bahan (material), bukan Set ujian pelajaran laluan. Ciri berbeza: lihat Panduan 3a.

> **Had demo semasa:** Kertas contoh **Bahagian dinamik** sudah dijawab oleh pelajar, jadi struktur soalan dikunci — hanya **Tetapan** boleh diubah. Panduan ini menunjukkan keadaan terkunci itu. Ia **bukan** contoh peperiksaan penuh. Langkah “tambah bahagian / tambah soalan” tidak dapat ditunjukkan pada kertas ini.

Bahasa Melayu

1. Dashboard guru

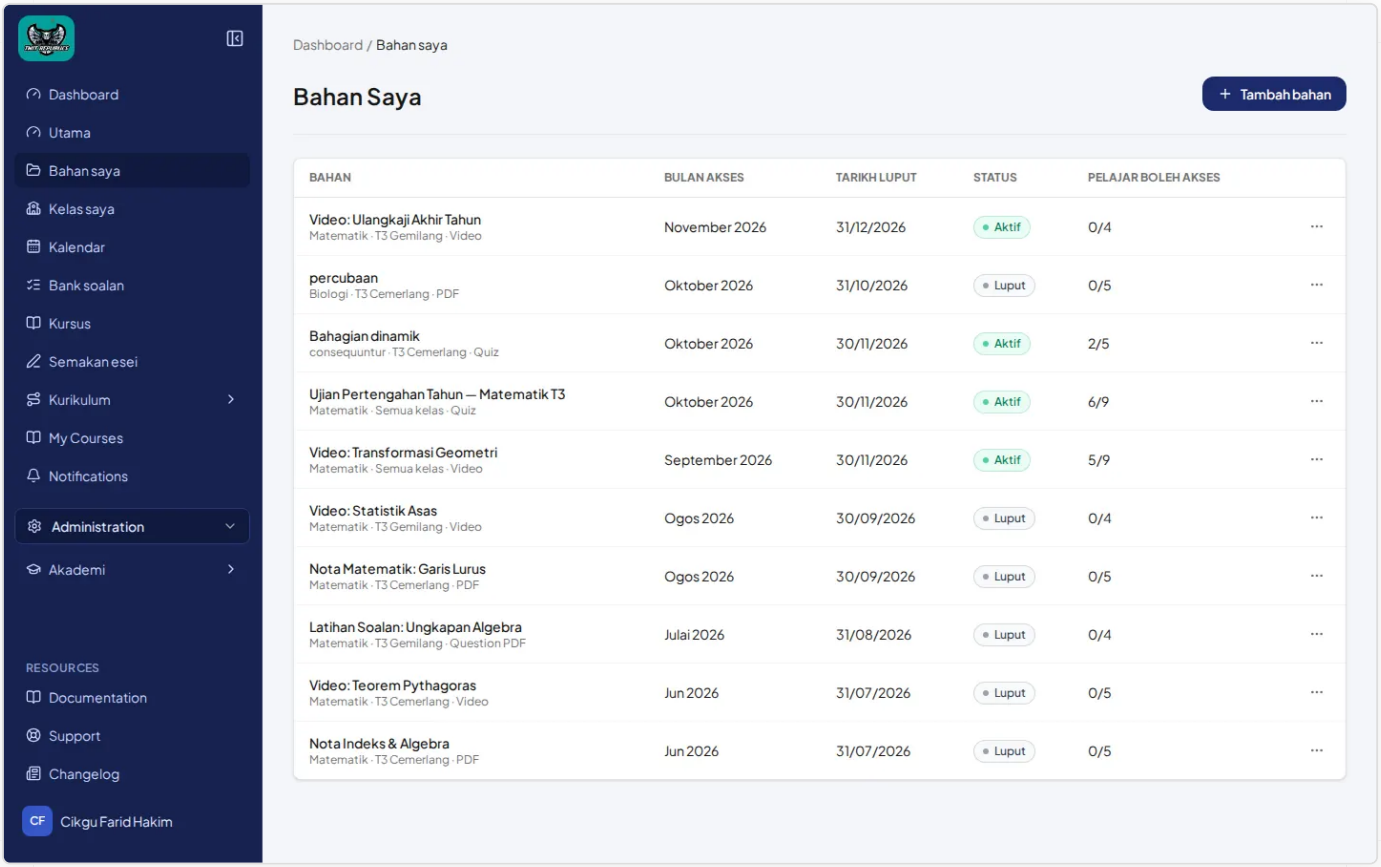

1. Log masuk sebagai guru. Halaman **Utama** / dashboard menunjukkan ringkasan bahan aktif, luput, bilangan pelajar, dan akses.

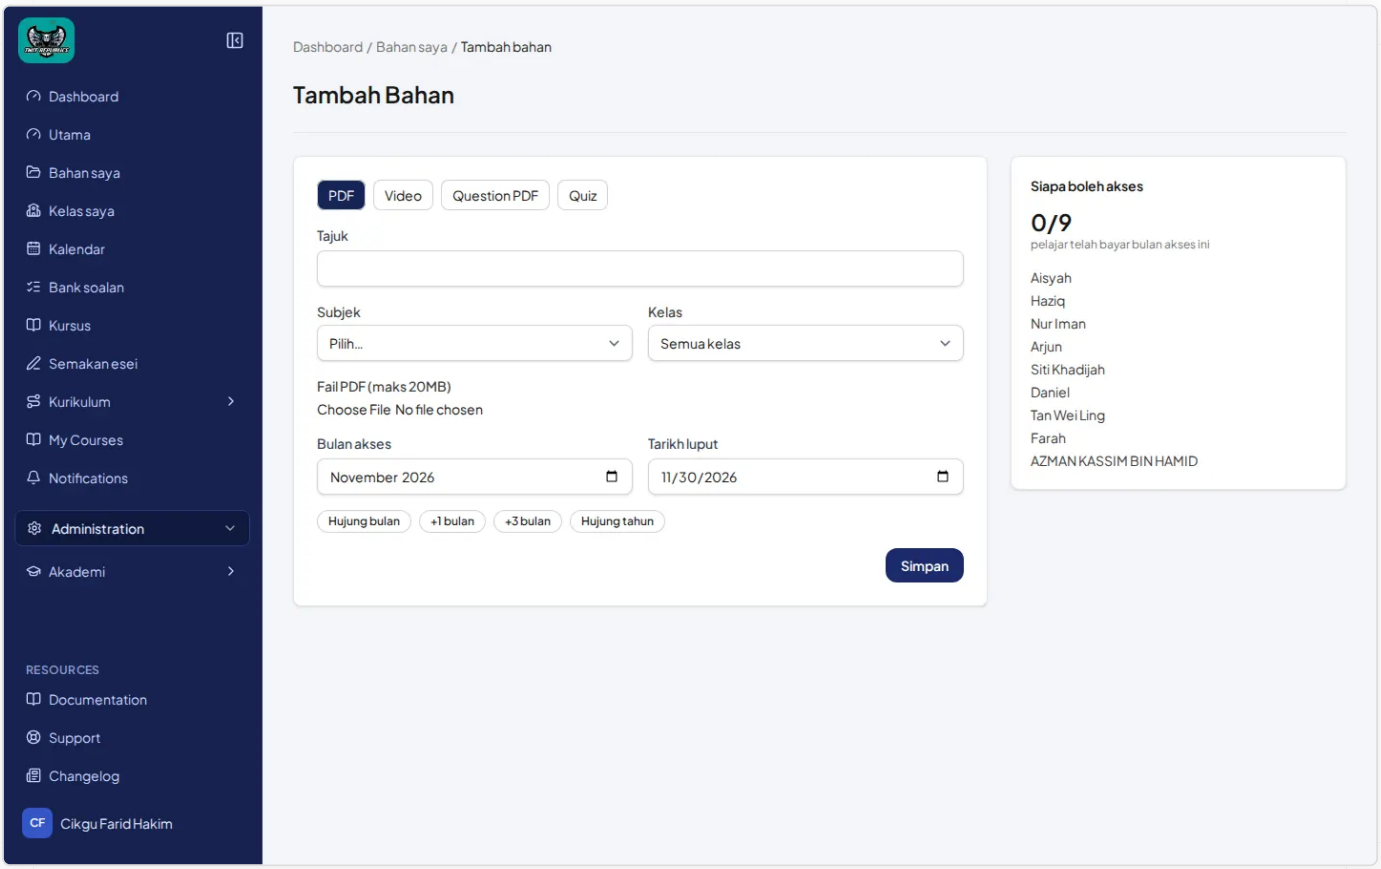

Rajah 1 — Dashboard Cikgu Farid Hakim (Utama Guru).

2. Bahan saya

1. Menu guru: **Bahan saya** → **+ Tambah bahan**.
2. Cari bahan jenis Quiz, cth. **Bahagian dinamik** (Aktif).
3. Borang tambah bahan: tab PDF / Video / Question PDF / Quiz; medan Tajuk, Subjek, Kelas, fail, Bulan akses, Tarikh luput; panel **Siapa boleh akses**.

Rajah 2 — Bahan Saya, termasuk Bahagian dinamik (Quiz).

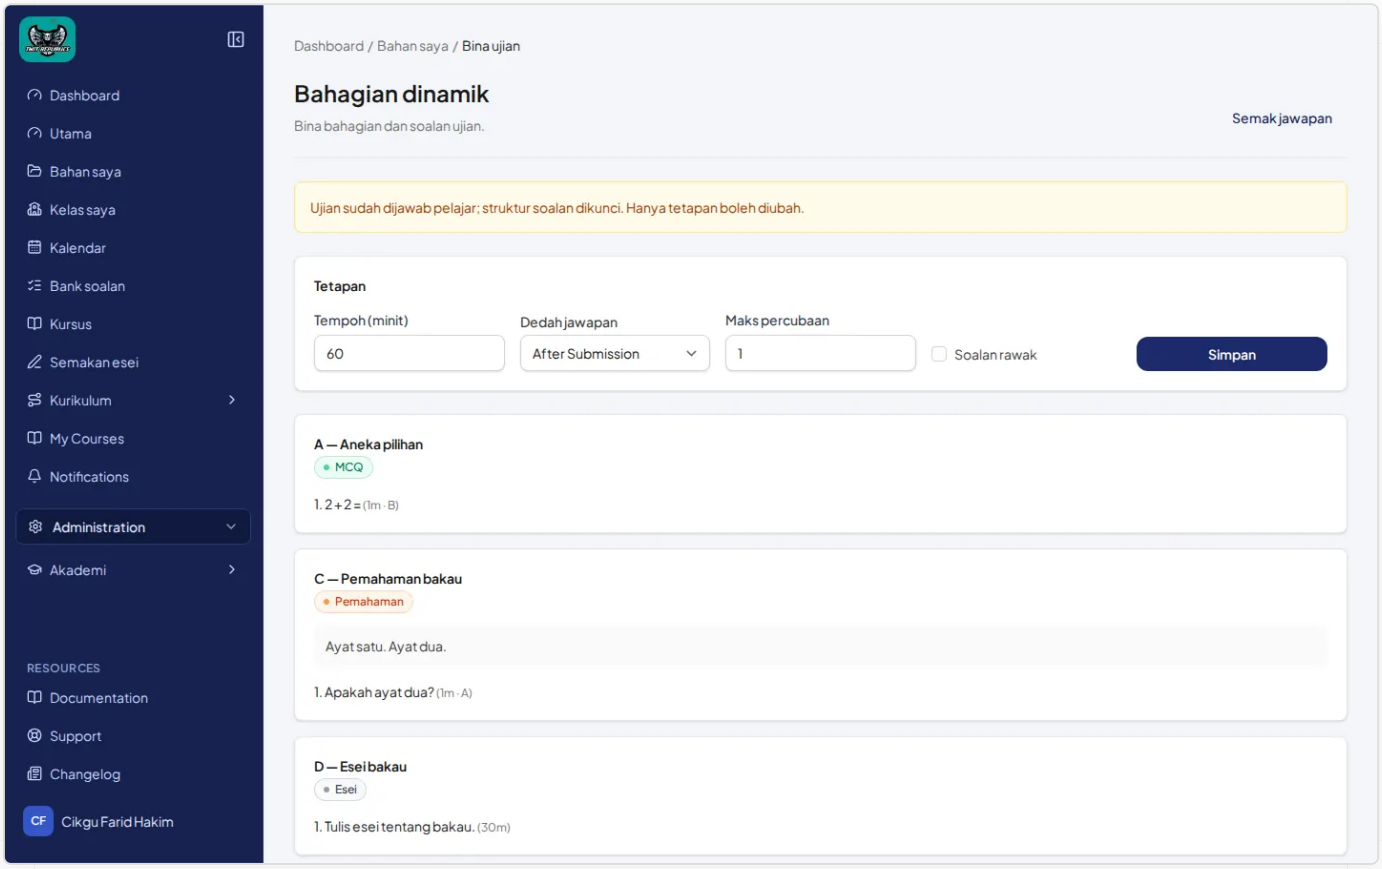

Rajah 3 — Borang tambah bahan.

3. Bina ujian (skrin terkunci — diperhatikan)

1. Breadcrumb: **Dashboard / Bahan saya / Bina ujian**. Tajuk kertas: **Bahagian dinamik**. Subteks: “Bina bahagian dan soalan ujian.” Pautan **Semak jawapan**.

2. Banner kuning:
   Ujian sudah dijawab pelajar; struktur soalan dikunci. Hanya tetapan boleh diubah.
3. **Tetapan** (masih boleh disimpan): **Tempoh (minit)** (cth. 60), **Dedah jawapan** (cth. After Submission), **Maks percubaan** (cth. 1), kotak **Soalan rawak**, butang **Simpan**.
4. Bahagian yang kelihatan pada kertas demo ini (dikunci): **A — Aneka pilihan** (badge **MCQ**), **C — Pemahaman bakau** (badge **Pemahaman**), **D — Esei bakau** (badge **Esei**). Badge jenis **Subjektif** wujud dalam sistem tetapi tidak dipamerkan pada skrin demo ini.

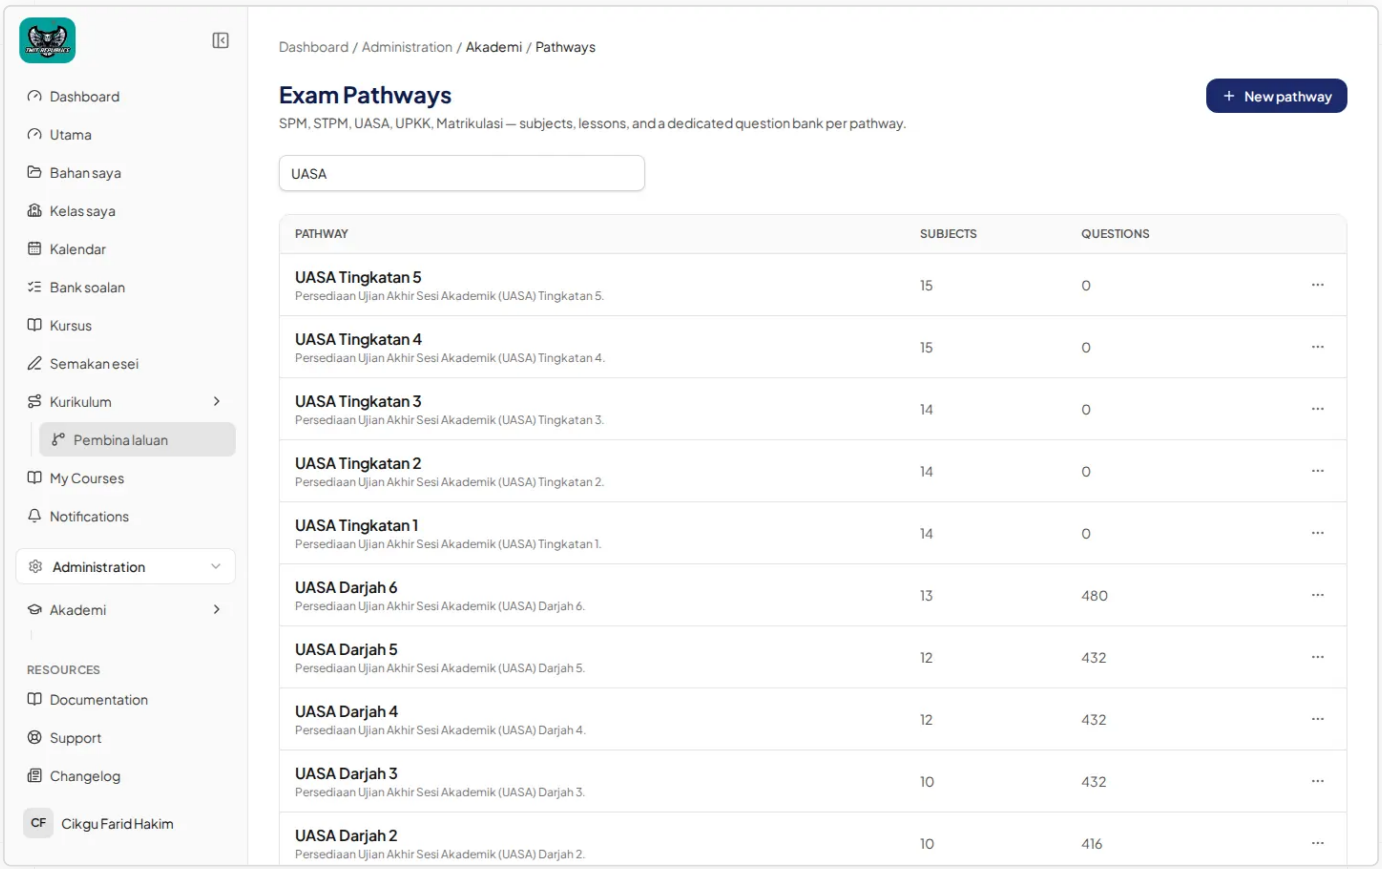

Rajah 4 — Bahagian dinamik: struktur dikunci; Tetapan masih boleh diubah.

4. Aliran cipta (apabila struktur TIDAK dikunci)

1. Pada kertas baharu / draf tanpa percubaan pelajar, UI membolehkan **Tambah bahagian** dengan **Jenis** **MCQ**, **Subjektif**, **Pemahaman**, **Esei** (dan **Petikan** untuk pemahaman), serta tambah soalan / salin dari bank.
2. **Langkah-langkah itu tidak dapat ditunjukkan pada “Bahagian dinamik”** kerana struktur dikunci selepas jawapan pelajar. Untuk aliran cipta penuh, gunakan kertas ExamBuilder baharu tanpa percubaan pelajar.

5. Pathways / Pembina laluan (guru)

1. Guru juga boleh membuka **Pathways** / **Pembina laluan** (melalui Kurikulum atau Administration › Akademi) untuk melihat laluan seperti UASA.

Rajah 5 — Guru membuka Pathways / Pembina laluan.

English

Guide 3b — build exams on teacher materials, not pathway lesson Set ujian. Different feature: see Guide 3a.

> **Current demo limit:** The sample paper **Bahagian dinamik** has already been answered by a student, so question structure is locked — only **Tetapan** (settings) can change. This guide shows that locked state. It is **not** a full exam example. “Add section / add question” steps cannot be shown on this paper.

1. Teacher dashboard

1. Sign in as a teacher. The **Utama** / dashboard shows active materials, expiries, student counts, and access. See **Figure 1**.

2. My materials (Bahan saya)

1. Teacher menu: **Bahan saya** → **+ Tambah bahan**.
2. Find a Quiz material, e.g. **Bahagian dinamik** (Active).
3. Add-material form: PDF / Video / Question PDF / Quiz tabs; Title, Subject, Class, file, Access month, Expiry; **Siapa boleh akses** panel. See **Figure 2** and **Figure 3**.

3. Build exam (locked screen — observed)

1. Breadcrumb: **Dashboard / Bahan saya / Bina ujian**. Paper title: **Bahagian dinamik**. Subtext: “Build sections and exam questions.” Link **Semak jawapan**.

2. Yellow banner: exam already answered by students; question structure locked; only settings can change.
3. **Tetapan** (still savable): **Tempoh (minit)** (e.g. 60), **Dedah jawapan** (e.g. After Submission), **Maks percubaan** (e.g. 1), **Soalan rawak** checkbox, **Simpan**.
4. Locked sections visible on this demo paper: **A — Aneka pilihan** (**MCQ**), **C — Pemahaman bakau** (**Pemahaman**), **D — Esei bakau** (**Esei**). **Subjektif** exists in the product but is not shown on this demo screen. See **Figure 4**.

4. Creation flow (when structure is NOT locked)

1. On a new paper / draft with no student attempts, the UI allows **Tambah bahagian** with types **MCQ**, **Subjektif**, **Pemahaman**, **Esei** (and **Petikan** for comprehension), plus add/copy questions from the bank.
2. **Those steps cannot be shown on "Bahagian dinamik"** because structure is locked after student answers. For a full creation walkthrough, use a new ExamBuilder paper with no student attempts.

5. Pathways / pathway builder (teacher)

1. Teachers can also open **Pathways** / **Pembina laluan** (via Kurikulum or Administration › Akademi) to view pathways such as UASA. See **Figure 5**.
