Bagaimana mengurus Bank soalan

Cipta soalan, pilihan, kunci jawapan, kumpulkan ke set, dan perbezaan Guru vs Administrator. Contoh utama: soalan **UASA Darjah 3**; contoh kedua: bank **UPKK** (144 soalan).

Bahasa Melayu

1. Buka Question bank

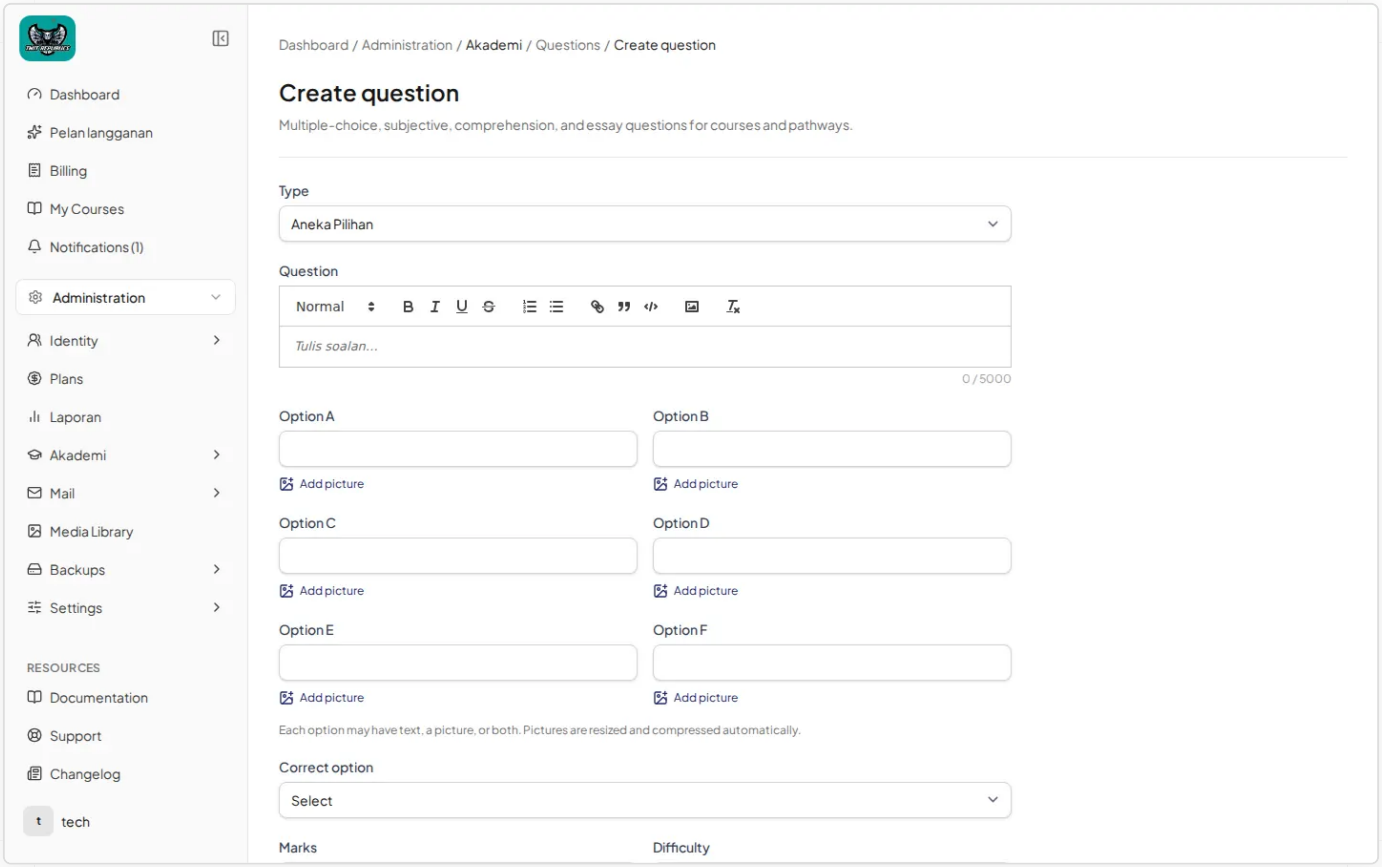

1. **Administration** › **Akademi** › Questions → halaman **Question bank**.
2. Butang **Imports** (administrator sahaja) dan **+ New question**. Carian: **Search question, topic, or ID**. Penapis status: **All statuses**.
3. Lajur: Question (badge jenis cth. **Aneka Pilihan**), Topic, Difficulty, Status (**Approved**).

Rajah 1 — Question bank: Aneka Pilihan, Approved (contoh rekod UPKK Bahasa Arab).

2. Cipta soalan

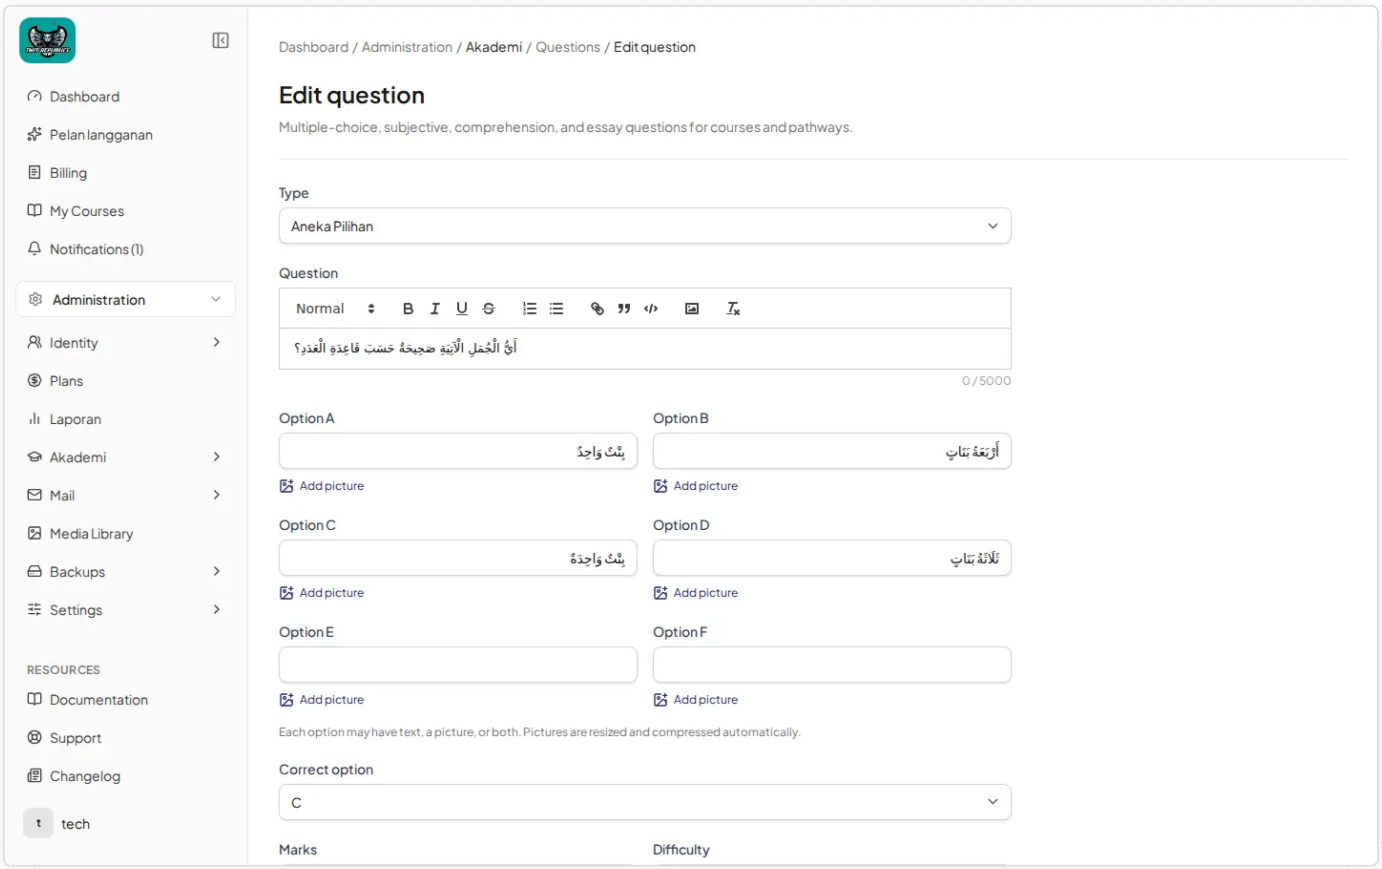

1. **+ New question** → **Create question**.
2. **Type**: **Aneka Pilihan**, Subjektif, Pemahaman, atau Esei.
3. Medan **Question** (placeholder **Tulis soalan…**).
4. Untuk Aneka Pilihan: **Option A**–**F** (boleh **Add picture**), kemudian **Correct option**.
5. **Marks**, **Difficulty**, dan medan lain di bahagian bawah borang.

Rajah 2 — Create question: Type Aneka Pilihan, Option A–F, Correct option.

3. Sunting & kunci jawapan

1. Buka soalan sedia ada → **Edit question**.
2. Pastikan **Correct option** ditetapkan (cth. **C**).
3. Guru hanya boleh sunting/padam soalan yang **dicipta sendiri**. **Approve** dan **Archive** ialah tindakan administrator.

Rajah 3 — Edit question dengan pilihan dan Correct option.

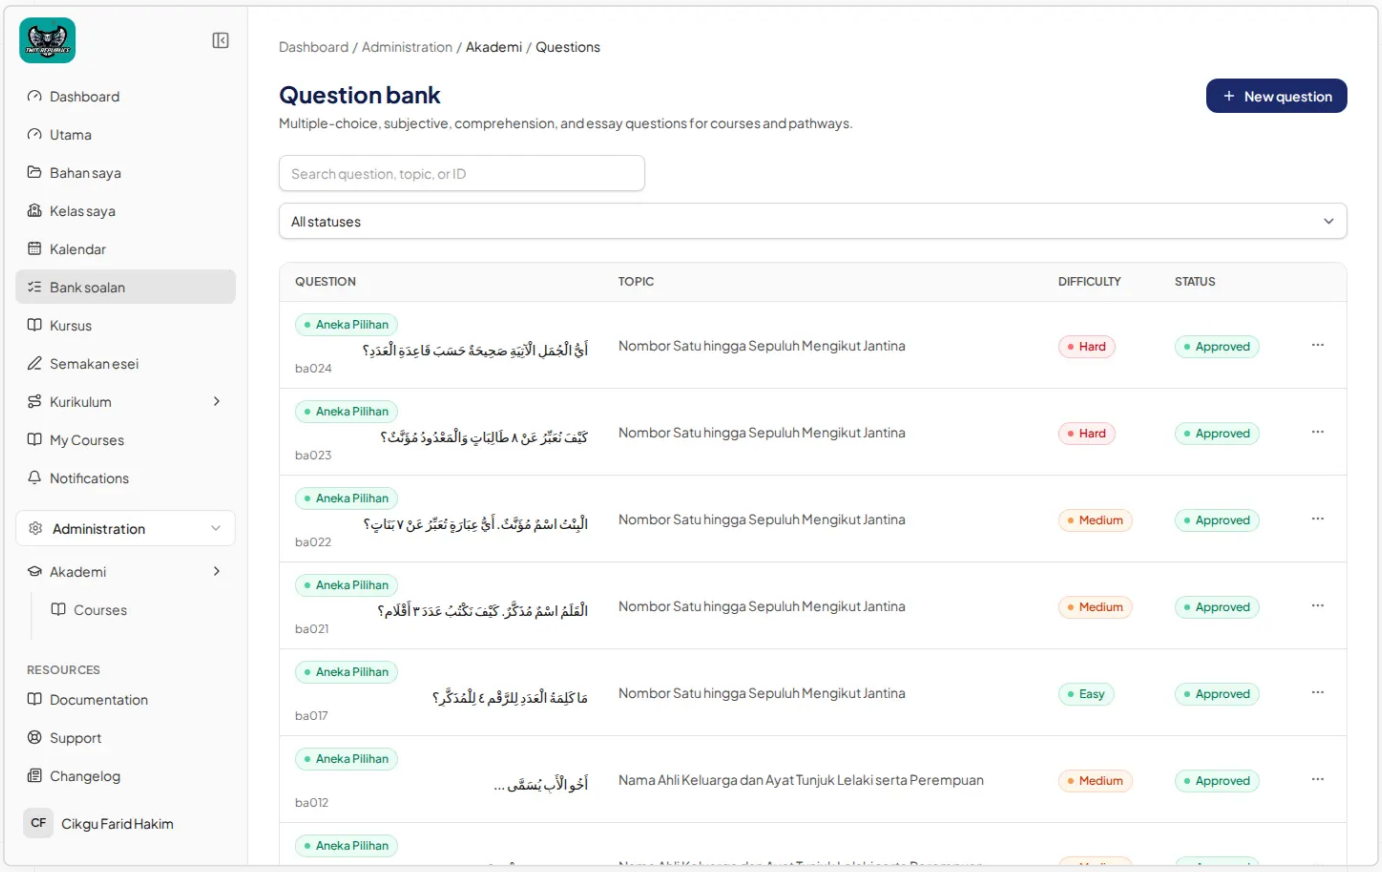

4. Kumpulkan ke set

1. Soalan diluluskan (**Approved**) ditag ke laluan (tab **Bank soalan** pada pathway, cth. 432 untuk UASA Darjah 3).
2. Kemudian ia dipilih ke dalam **Set ujian** pelajaran — lihat Panduan 3a. Itu cara “set” dibentuk untuk simulasi laluan.

5. Guru vs Administrator

Imports, **Approve**, dan **Archive** ialah **administrator sahaja**. Guru boleh lihat & cipta soalan; sunting/padam hanya untuk soalan sendiri. Guru **tidak** mempunyai Imports.

Tindakan	Administrator / Superadmin	Guru
Lihat & cipta soalan	Ya	Ya
Sunting / padam	Ya	Hanya soalan sendiri
Approve / **Archive**	Ya	Tidak
Imports	Ya (jika feature Imports on)	Tidak

English

Create questions, options, answer keys, group into sets, and understand Guru vs Administrator. Primary examples: **UASA Darjah 3** questions; secondary: **UPKK** bank (144 questions).

1. Open Question bank

1. **Administration** › **Akademi** › Questions → **Question bank** page.
2. Buttons: **Imports** (administrators only) and **+ New question**. Search: **Search question, topic, or ID**. Status filter: **All statuses**.
3. Columns: Question (type badge e.g. **Aneka Pilihan**), Topic, Difficulty, Status (**Approved**). See **Figure 1**.

2. Create a question

1. **+ New question** → **Create question**.
2. **Type**: **Aneka Pilihan**, Subjective, Comprehension, or Essay.
3. **Question** field (placeholder **Tulis soalan…**).
4. For multiple choice: **Option A** – **F** (optional **Add picture**), then **Correct option**.
5. **Marks**, **Difficulty**, and other fields at the bottom of the form. See **Figure 2**.

3. Edit & answer key

1. Open an existing question → **Edit question**.
2. Ensure **Correct option** is set (e.g. **C**).

3. Teachers may edit/delete only questions they **created themselves**. **Approve** and **Archive** are administrator actions. See **Figure 3**.

4. Collect into a set

1. Approved questions are tagged to a pathway (**Bank soalan** tab on the pathway, e.g. 432 for UASA Darjah 3).
2. They are then picked into a lesson **Set ujian** — see Guide 3a. That is how a “set” is formed for pathway simulation.

5. Teacher vs Administrator

Imports, **Approve**, and **Archive** are **administrator-only**. Teachers can view and create questions; they edit/delete only their own. Teachers do **not** have Imports.

Action	Administrator / Superadmin	Teacher (Guru)
View & create questions	Yes	Yes
Edit / delete	Yes	Own questions only
Approve / **Archive**	Yes	No
Imports	Yes (if Imports feature on)	No

See **Figure 4** for the teacher view of Question bank.
